[MS-DTCO]: MSDTC Connection Manager: OleTx Transaction Protocol

Errata below are for Protocol Document Version V24.0 – 2015/06/30.

Errata Published YYYY/MM/DD	Description
2015/07/06	In Section 3.2.7.11, Create Subordinate Enlistment, and Section 3.2.7.21, Export Transaction, corrected the default limit of Subordinate Enlistments.
	In Section 3.2.7.11, Create Subordinate Enlistment, changed from:
	If this computed number of Enlistment objects is greater than or equal to an implementation-specific value that indicates the maximum allowed Transaction Manager Enlistments:<29>
	<29> Section 3.2.7.11: The limit of Subordinate Enlistments depends on the version of Windows. The default limit on Subordinate Resource Manager Enlistments is 32, except for Windows NT 4.0 Option Pack, where the limit is 16.
	Changed to:
	If this computed number of Enlistment objects is greater than or equal to an implementation-specific value that indicates the maximum allowed Transaction Manager Enlistments:<29>
	<29> Section 3.2.7.11: The limit of Subordinate Enlistments depends on the type of Enlistment. The default limit on Subordinate Transaction Manager Enlistments is 64 on Windows implementations, except for Windows NT 4.0 Option Pack, where the limit is 16. The limit on Subordinate Resource Manager Enlistments for Windows implementations is 32.
	In Section 3.2.7.21, Export Transaction, changed from:
	If that number is equal to an implementation-specific value that indicates the maximum allowed Transaction Manager enlistments:<31>
	<31> Section 3.2.7.21: The limit of Subordinate Enlistments depends on the version of Windows. The default limit on Subordinate Resource Manager Enlistments is 32, except for Windows NT 4.0 Option Pack, where the limit is 16.
	Changed to:
	If that number is equal to an implementation-specific value that indicates the maximum allowed Transaction Manager enlistments:<31>
	<31> Section 3.2.7.21: The limit of Subordinate Enlistments depends on the type of Enlistment. The default limit on Subordinate Transaction Manager Enlistments is 64 on Windows implementations, except for Windows NT 4.0 Option Pack, where the limit is 16. The limit on Subordinate Resource Manager Enlistments for Windows implementations is 32.
