## [MS-FSCC]: File System Control Codes

This topic lists the Errata found in the MS-FSCC document since it was last published. Since this topic is updated frequently, we recommend that you subscribe to these RSS or Atom feeds to receive update notifications.

Errata are subject to the same terms as the Open Specifications documentation referenced.

Errata below are for Protocol Document Version <u>V52.0 - 2022/04/29</u>.

Errata Published*	Description
2023/02/14	In MS-FSCC, added a new section documenting the FSCTL_VIRTUAL_STORAGE_QUERY_PROPERTY:
	Changed to:
	2.3.91 FSCTL_VIRTUAL_STORAGE_QUERY_PROPERTY Request
	This request contains a message with the same structure as the IOCTL_STORAGE_QUERY_PROPERTY request (section 2.8.1) with the following values:
	PropertyId (4 bytes): 0x00000004
	QueryType (4 bytes): 0x00000000
	Remote servers SHOULD ignore this request.<86>

Errata Published*	Description
	<86> Section 2.3.91: All Windows Server versions return STATUS_NOT_IMPLEMENTED.
2023/01/30	In section 2.4.7, revised behavior notes 97 through 100 to indicate the responses to a -2 value for certain attributes on different file systems.
	Changed from:

<97> Section 2.4.7: The file system updates the values of

the **LastAccessTime**, **LastWriteTime**, and **ChangeTime** members as appropriate after an I/O operation is performed on a file. However, a driver or application can request that the file system not update one or more of these members for I/O operations that are performed on the caller's file handle by setting the appropriate members to -1. A driver or application can subsequently request that the file system resume updating one or more of these members for I/O operations that are performed on the caller's file handle by setting the appropriate members to -2. The caller can set one, all, or any other combination of these three members to -1 and/or -2. Only the members that are set to -1 will be unaffected by I/O operations on the file handle; the other members will be updated as appropriate. This behavior is consistent across all file system types. Note that even though -1 and -2 can be used with the **CreationTime** field, they have no effect because file creation time is never updated in response to file system calls such as read and write.

File system	Support value of -2
FAT	No
EXFAT	No
FAT32	No
Cdfs	No
UDFS	No
NTFS	Windows 8.1 and later, Windows Server 2012 R2 and later, and Windows Server v1709 operating system and later
ReFS	Windows 10 v1507 operating system and later, Windows Server 2016 and later, and Windows Server v1709 and later

<98> Section 2.4.7: The file system updates the values of

the **LastAccessTime**, **LastWriteTime**, and **ChangeTime** members as appropriate after an I/O operation is performed on a file. However, a driver or application can request that the file system not update one or more of these members for I/O operations that are performed on the caller's file handle by setting the appropriate members to -1. A driver or application can subsequently request that the file system resume updating one or more of these members for I/O operations that are performed on the caller's file handle by setting the appropriate members to -2. The caller can set one, all, or any other combination of these three members to -1 and/or -2. Only the members that are set to -1 will be unaffected by I/O operations on the file handle; the other members will be updated as appropriate. This behavior is consistent across all file system types. Note that even though -1 and -2 can be used with the **CreationTime** field, they have no effect because file creation time is never updated in response to file system calls such as read and write.

File system	Support value of -2
FAT	No
EXFAT	No
FAT32	No

Errata Published*	Description	
	Cdfs	No
	UDFS	No
	NTFS	Windows 8.1 and later, Windows Server 2012 R2 and later and Windows Server v1709 and later
	ReFS	Windows 10 v1507 and later, Windows Server 2016 and later, and Windows Server v1709 and later

<99> Section 2.4.7: The file system updates the values of

the **LastAccessTime**, **LastWriteTime**, and **ChangeTime** members as appropriate after an I/O operation is performed on a file. However, a driver or application can request that the file system not update one or more of these members for I/O operations that are performed on the caller's file handle by setting the appropriate members to -1. A driver or application can subsequently request that the file system resume updating one or more of these members for I/O operations that are performed on the caller's file handle by setting the appropriate members to -2. The caller can set one, all, or any other combination of these three members to -1 and/or -2. Only the members that are set to -1 will be unaffected by I/O operations on the file handle; the other members will be updated as appropriate. This behavior is consistent across all file system types. Note that even though -1 and -2 can be used with the **CreationTime** field, they have no effect because file creation time is never updated in response to file system calls such as read and write.

File system	Support value of -2

2023/01/10	In section 2.3.74, FSCTL_SET_INTEGRITY_INFORMATION Reply, added STATUS_NOT_SUPPOR to the error codes list:  Changed from:				
	Error code	Meaning			
	STATUS_INVALID_PARAMETER 0xC000000D	The input buffer length is less than the size, in bytes, of the FSCTL_SET_INTEGRITY_INFORMATION_BUFFER element; the handle is not to a file or directory; or the requested ChecksumAlgorithm field is not one of the values listed in the table for the ChecksumAlgorithm field in the FSCTL_SET_INTEGRITY_INFORMATION Request.			
	STATUS_INVALID_DEVICE_REQUEST 0xC0000010	The volume does not support integrity.			
	STATUS_DISK_FULL 0xC000007F	The disk is full.			
	Changed to:				
	Error code	Meaning			
	STATUS_INVALID_PARAMETER 0xC000000D	The input buffer length is less than the size, in bytes, of the FSCTL_SET_INTEGRITY_INFORMATION_BUFFER element; the handle is not to a file or directory; or the requested ChecksumAlgorithm field is not one of the values listed in the table for the ChecksumAlgorithm field in the FSCTL_SET_INTEGRITY_INFORMATION Request.			
STATUS_INVALID_DEVICE_REQUEST The volume does not support 0xC0000010		The volume does not support integrity.			

Errata Published*	Description	
	STATUS_DISK_FULL 0xC000007F	The disk is full.
	STATUS_NOT_SUPPORTED 0xC00000BB	The file has been ghosted (allocation blocks are being shared).

In section 2.3.75, FSCTL\_SET\_INTEGRITY\_INFORMATION\_EX Request, revised note <76> to indicate which versions support this request:

#### Changed from:

<76> Section 2.3.75: The FSCTL\_SET\_INTEGRITY\_INFORMATION\_EX Request message is supported only by the ReFS file system v3.2 or higher (Windows 10 v1507 operating system or higher). FSCTL\_SET\_INTEGRITY\_INFORMATION\_EX is processed as described on systems updated with [MSKB-5014019], [MSKB-5014021], [MSKB-5014022], [MSKB-5014023], [MSKB-5014701], [MSKB-5014702], or [MSKB-5014710].

#### Changed to:

<76> Section 2.3.75: The FSCTL\_SET\_INTEGRITY\_INFORMATION\_EX Request message is supported only by Windows Server 2022 and higher, and Windows 11, version 22H2 operating system and higher. FSCTL\_SET\_INTEGRITY\_INFORMATION\_EX is processed as described on systems updated with [MSKB-5014019], [MSKB-5014021], [MSKB-5014022], [MSKB-5014023], [MSKB-5014701], [MSKB-5014702], or [MSKB-5014710].

In section 2.3.76, FSCTL\_SET\_INTEGRITY\_INFORMATION\_EX Reply, added STATUS\_NOT\_SUPPORTED to the error codes list:

#### Changed from:

Error code	Meaning
STATUS_INVALID_PARAMETER 0xC000000D	The input buffer length is less than the size, in bytes, of the FSCTL_SET_INTEGRITY_INFORMATION_BUFFER_EX element; the handle is not to a file or directory; or Version is not equal to 1.
STATUS_INVALID_DEVICE_REQUEST 0xC0000010	The volume does not support integrity.
STATUS_DISK_FULL 0xC000007F	The disk is full.

### Changed to:

Error code	Meaning
STATUS_INVALID_PARAMETER 0xC000000D	The input buffer length is less than the size, in bytes, of the FSCTL_SET_INTEGRITY_INFORMATION_BUFFER_EX element; the handle is not to a file or directory; or Version is not equal to 1.
